Subject: Borchardt Final Report Kewaunee County Groundwater Quality DNR Project 227.pdf

Dear Cheryl,

To recap our call today, I have attached the final Borchardt study and the updated spills sheet from Davinas office I received December 4, sent in an earlier email.

Per the SDWA, I want to make you and your office aware that the clean drinking water kiosk at the high school has no longer been in service for over a month.

I would like to schedule a meeting in the very near future to discuss how the EPA will address finding the cause and source of our mass contamination in Kewaunee as was requested back in October of 2014.

As Kewaunee discusses its “manure crisis” I fully expect that the EPA will be engaged in the conversation of safeguarding our community’s health and acting in a way to circumvent the looming pollution events awaiting our community worsened by the inaction and non enforcement of WDNR.

We are requesting that the EPA provides oversight and enforcement to ensure that all provisions in the Clean Water Act are upheld.

Please inform us of the plan EPA has for providing water to community members in need. I was appalled to hear Town of Lincoln residents discuss this issue and how some residents lacked ability and access to clean drinking water escalated by the no longer functioning kiosk at the Algoma High school.

Thank you for hearing my concerns. I anticipate close communication as we head into what was not an unforeseen crisis, but rather a predictable outcome for the gross and negligent mishandling of millions upon millions of gallons of manure in our County.

Nancy
